DRS 5000/UNIVERSAL

The DRS5000/Universal is a microfilm reader/scanner for roll microfilm and microfiche. With its low price and a very small foot print the DRS5000/Universal Microfilm Reader/Scanner brings affordable, compact digital microfilm options to every microfilm media user; including Archives and Libraries. A single USB 2.0 connection to a computer supplies power and data line to the DRS5000/Universal. This allows researchers to easily scroll through microfilm or microfiche; zoom out for a full page or zoom in for enlarged detail. A single press of a button will capture the image instantly making it immediately available to save, print or transfer with multiple options such as email, CD or USB portable device. With a wide variety of simple interchangeable carriers the DRS5000/Universal will accept 16/35mm roll film, microfiche/microfilm in 3M style cartridges, and opaque cards. The single high quality, adjustable lens accepts reductions between 7x and 48x confirming the DRS5000/Universal as a truly versatile reader/scanner. The standard 360 degree image rotation simply takes the versatility to yet a higher level.

Specifications

Carriers	Manual 16/35mm Motorized 16/35mm Motorized 16mm & 3M cartridge Microfiche/Aperture card Combined motorized 16/35mm & microfiche
